

CDS200 II

Delegates' and Voting Unit EDC9 built-in version

Description

Within the CDS200 II system the delegates' and voting unit EDC9 serves as a microphone and voting unit. It is equipped with LC-Display, electronic Chipcard reader, loudspeaker for decentralized sound, 3 buttons for evaluation and parliamentary voting, Info-LED for indication of incoming messages and an illuminated microphone button.

The silver anodized frontplate can also be supplied in other colors. So it is relatively simply possible to give to the equipment your personal note, or adapt it into your interior.

The operating modes are managed by the central control unit and the CDS200 software respectively.

Technical Data

Complies with international standard IEC914

General
