

DIGIMIC®

Chairpersons' Conference Unit - DChair

Description

The Chairpersons' unit DChair is the conference leaders' frontend for communication within the DIGIMIC discussion system matching the necessary requirements.

In addition to the eloquent low profile design, the clearly arranged unit surface offers one microphone button for push-to-talk function.

To emphasize the Chairperson's importance this unit can be activated at any time independent of any system status. It also is equipped with an extra "mute all" button to override any active delegate if required.

The two integrated loudspeakers provide even decentralized voice amplification to increase the speech intelligibility especially for conference areas without a PA system.

In addition each DChair is equipped with an amplified headphone socket and corresponding volume control.

The wired product is easily upgraded by adding the docking unit DDoc with radio transmission technology and a rechargeable battery, which supports wireless applications. This upgrade transforms a formerly wired delegate unit into a wireless unit. This represents a new and exciting technology that will have real world use in a wide variety of applications.

Technical Data

DChair complies with international standard IEC914

Digital Audio

- high quality digital audio:
Sample Rate: 48kHz
Frequency response: 20 - 20,000 Hz
- Latency time: approx. 1ms microphone signal

Connectors

- Two D9 system cable connectors - self terminating
- Microphone socket
- Headphone socket

Features

- Illuminated microphone button for indication MIC ON/OFF
- Illuminated "mute all" button for permanent or temporarily overriding of all active delegate microphone units
- volume control for headphone
- Two integrated loudspeakers for decentralized audio amplification
- Data interface to wireless docking station

Housing

- housing upper part: plastic, silver painted
- housing lower part: plastic, black
- W x H x D: (139 x 18/44 x 141) mm
approx. (5.5 x 0.7/1.7 x 5.6) inch
- Weight: 256 g

Optional (not in delivery)

- **DMic** Delegates' Conference Unit
- **DDoc** Docking Unit for DMic
- **TMD/01** Conference Microphone with ring-shaped live indicator and integrated wind shield functionality, gooseneck
- **TM58/6** Conference Microphone with ring-shaped live indicator, gooseneck
