

CDSVAN

Dual Digital Delegates' Unit DDV9

WPF05.4033.E.050114 BRÄHLER ICS is committed to continually improving its products and so reserves the right to make technical modifications without notice.

Description

The dual digital delegates' unit DDV9 serves within the CDSVAN conference system as microphone unit and for the transmission of up to 32 languages for two participants. Furthermore votings and evaluations with YES, NO, or ABSTAIN are possible.

Password protected Chipcards make personal identification for e.g. name administration and lists of speakers possible.

With the development of the DDV9 the simple operation and the ergonomic arrangement of the keys were the center of attention.

The black/silver housing consists of impact resistant plastic and has a "silver" anodized aluminum control panel. If desired, the housing upper part and the control panel can be supplied in other colours. So it is relatively simply possible to give to the equipment your personal note, or adapt it to your Interieur. Further inscription variants are possible in all languages up to touch typing.

A shielded CAT5 connection cable (2m) is included in delivery.

Technical Data

Complies with international standard IEC914
